1490 Route 179  
Lambertville N.J 08530  
609-397-8032

We specialize in diagnostics for check engine lights, performance problems of all kinds and other fault indicators. Our inventory of diagnostic tools is large and up to date to handle whatever comes our way. Sensor problems are common but we see all sorts of things cause trouble codes. We document our processes and findings digitally for your review and for our records. Below are pictures of a few of our many diagnostic tools.
