Lambertville N.J 08530  
609-397-8032

---

We offer full cooling system services from coolant exchanges for maintenance to system components and testing for all of the above. We only use the type of coolant designed for your car (there are many types) and stock them all. We keep an eye on your cooling system when in and will let you know when service is needed. The two pictures below are of our exchange service machine and a system that has been neglected.
